**The numbers are showing the energy and water an article will save per square foot, comparing to the Bronze Rate (65%) in the latest LWG Protocol of 50.4 MJ/m² (4.68 MJ/sqf) for energy consumption and 134.1 L/m² (12.46 L/sqf) for water consumption.*

The concept started with a vision of our company and the requirements from brands to offer environmentally friendly Leather. LITE was born to provide our customers with the knowledge of carbon and water footprint usage for each of the leathers we create; giving customers the ability to choose the product that is the most environmentally-friendly, and with the lowest footprint. The LITE system is fully integrated into our manufacturing process, which is specially designed to reduce and control water and energy usage, as well as to reduce the amount of chemicals we use in the process. The effort we make is consistently minimizing our impact to the environment.

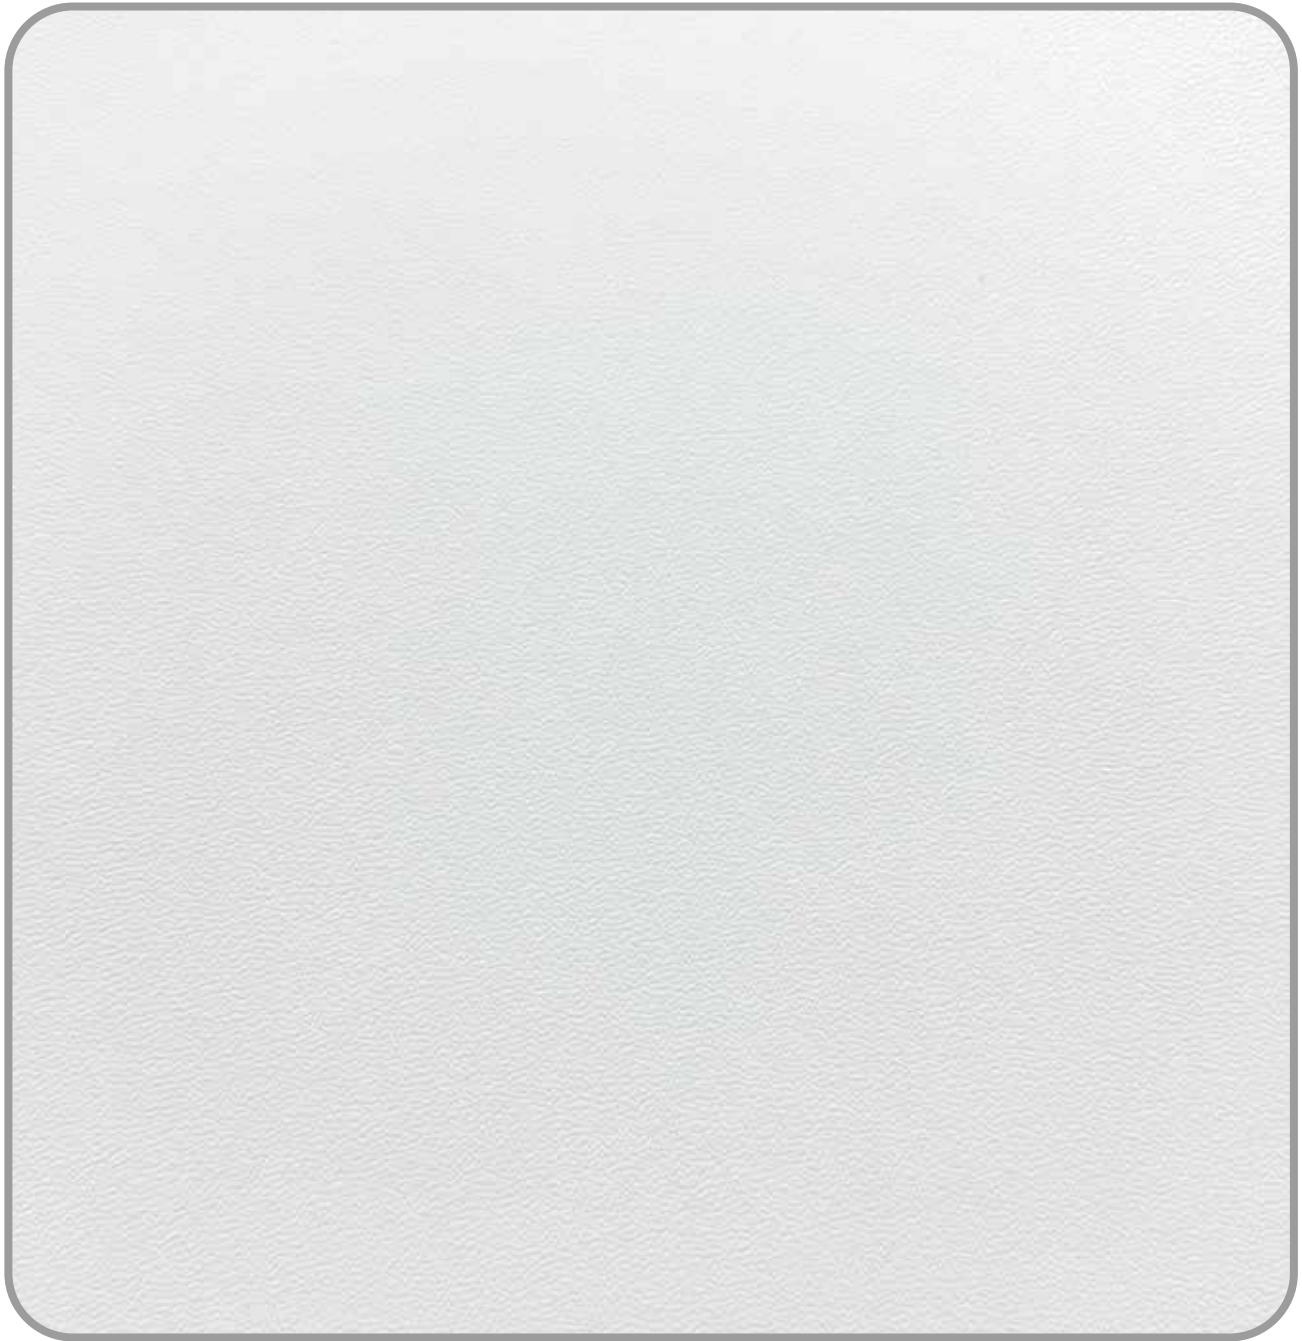

Be confident in the sustainability stories you are telling.
