

# ISA NextGenMaterials

ISA, the Next-Gen Material Manufacturer, specialized in producing sustainable leathers and sustainable additional materials

ISA NextGenMaterials

## Business Units

### ISA TanTec

ISA TanTec™, manufactures LITE (Low Impact To the Environment) leather with our commitment to minimize negative environmental impacts

### ISA COSM™

ISA COSM™ (Creation of Sustainable Materials), specialized in the development and production of sustainable additional materials

## Divisions

### ISA is diversified in many leather using industries

Our innovative approach brings added value to our customers. Another reason why we are the "Brand behind the Brand".

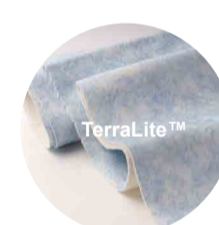

Utilize plant based materials which are biodegradable

Manufacture products that possess circularity

COSM materials can replace petrochemical based synthetics

## Products

## All facilities are 100% owned by ISA

## LWG Environmental Audit Protocol

ISA TanTec 43.1 (Water Consumption) 18.8 (Energy Consumption)

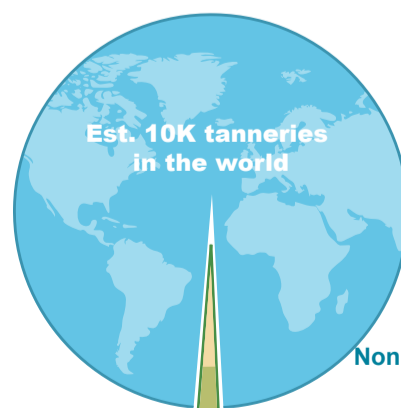

ISA TanTec outperforms the Gold Rated score benchmark

The LITE (Low Impact To the Environment) concept has been developed to ensure our manufacturing process is operated sustainably, saving energy and water while minimizing chemical use. It has made ISA TanTec an LWG Gold-Rated leather manufacturer and consistently outperforms the pass score benchmark set by LWG in energy and water saving. Using EY audited calculation methodology, LITE provides customers with carbon, water and energy usage for each of our leather creations.

Water Consumption (Litre/ M2)  
Energy Consumption (MJ/ M2)

\*Source from latest Leather Working Group protocol

96% Non LWG Members

only 4% tanneries are LWG Members

2% LWG members are gold rated

433 LWG Members
